DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 5, 6, 8-11, 13, 15-18, and 27, drawn to traffic scheduling, classified in class 370, subclass 395.4.
- II. Claims 19-26 and 40-46, drawn to routing data packets, classified in class 709, subclass 238.
- III. Claims 28-36, 38, and 39, drawn to packet switching in relation to voice agents, classified in class 370, subclass 352.

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, such as the scheduling and forwarding of traffic based on certain criteria, which may be performed separately from the other inventions. This constitutes the assignment of certain information to be transmitted. Invention II discloses a router routing data packets through a network. Invention III discloses a voice agent and reserving communication resources in relation to the voice agent. These teachings may all be implemented separately from one another.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
